PROJECTS

Game Arena | Front-End Development

- Developed a responsive gaming platform using React.js, HTML5, CSS3, and Tailwind CSS, featuring **9 games across 5 pages.**

- Built a modern user interface with intuitive navigation, reusable UI components, and a structured footer to ensure a consistent browsing experience across different screen sizes.

MAZEN & MONA WEDDING | Front-End Development

- Built a responsive wedding invitation website using React.js, Vite, and Tailwind CSS, featuring elegant animations and interactive UI elements.

- Implemented a countdown timer, wedding story timeline, RSVP form interface, background music controls, and Google Maps integration for convenient access to the wedding venue.

HALCYON CINEMA | Front-End Development

- Developed a responsive cinema website using React.js, HTML5, CSS3, and Tailwind CSS to provide an engaging

movie browsing experience.

- Designed a modern cinematic user interface with movie showcases, dynamic content sections, smooth animations, intuitive navigation, and a ticket-booking interface.
